

Test Automation Engineer – Marcin Nieckosiński

WHY MARCIN

- Over 5 years of professional experience in test automation and software quality assurance across banking, automotive, and IT industries,
 - Expertise in UI and API test automation using Python, JavaScript, Selenium, Nightwatch, and Robot Framework,
 - Strong background in CI/CD pipeline management with Azure DevOps and Jenkins, integrating automated tests into build and release processes,
 - Experienced in manual and automated testing for both web and mobile applications, ensuring functionality, performance, and reliability,
 - Hands-on knowledge of embedded systems testing (CAN, LIN, Ethernet) in the automotive sector,
 - Proven ability to lead and mentor test engineering teams, create test frameworks, and deliver comprehensive documentation.
-

SKILLS

- **Test Automation:** Python, JavaScript, Selenium, Nightwatch, Robot Framework,
- **CI/CD Pipelines:** Azure DevOps, Jenkins,
- **Version Control:** Git,
- **Bug Tracking & Test Management:** Jira, Jira xRay,
- **Database Testing:** Oracle SQL,
- **Cloud Platforms:** Azure DevOps environments,
- **Manual Testing:** Web & mobile, smoke, black-box, white-box,
- **Embedded Systems Testing:** CAN, LIN, Ethernet protocols,
- **Testing Types:** Regression, integration, system, environmental tests,

- **Team Leadership:** Mentoring QA engineers, knowledge sharing,
- **Test Documentation:** Comprehensive test cases, scenarios, results reporting,
- **Soft Skills:** Effective communication, adaptability, international teamwork.

CERTIFICATES AND TRAININGS

- ISTQB Foundation Level Certificate,
- Python Programming Training.

LANGUAGES

- English – C1.

PROFESSIONAL EXPERIENCE

11.2014 – Currently

Company name: **Scalo Sp. z o.o.**

Job position: **Senior Automation Test Engineer**

Tasks:

- Designed, implemented, and maintained automated test cases for banking web applications using Nightwatch and JavaScript, ensuring coverage of all critical functionalities,
- Developed and optimized CI/CD pipelines in Azure DevOps, integrating automated regression tests into daily builds, which significantly accelerated release cycles,
- Created comprehensive test documentation, covering test scenarios, execution results, and improvement proposals,
- Improved the existing JavaScript test framework, focusing on reusability, efficiency, and reducing execution time,
- Actively collaborated with developers, business analysts, and QA teams using Jira for defect tracking and Git for version control.

Technologies: Nightwatch, JavaScript, Azure DevOps, Jira, Git.

01.2023 – 11.2024

Company name: **Avenga IT Professionals Sp. z o.o.**

Job position: **Senior Automation Test Engineer at mBank**

Tasks:

- Led a team of QA engineers in automating regression, integration, and functional tests for banking applications using Selenium with Java, improving coverage and reducing manual work,
- Established standardized QA processes, including planning, execution, defect management, and reporting in Jira, ensuring consistency across multiple teams,
- Conducted API automation using Swagger and Postman, validating backend services and ensuring compliance with performance requirements,
- Created automation frameworks and clear technical documentation, while organizing knowledge-sharing sessions and mentoring colleagues in Python automation,
- Integrated test automation into Azure DevOps pipelines, achieving continuous quality monitoring and faster delivery.

Technologies: Selenium (Java), Swagger, Postman, Python, Jira, Git, Azure DevOps.

06.2022 – 01.2023

Company name: **SII Sp. z o.o.**

Job position: **Senior Test Lab Engineer at Magneti Marelli**

Tasks:

- Designed and executed automated test cases for automotive lighting systems using Python, ensuring reliable performance across multiple scenarios,
- Performed smoke, black-box, and white-box testing, validating compliance with functional and quality standards,

- Conducted environmental testing to evaluate durability of systems in extreme conditions, leveraging CAN bus integration to simulate real-world automotive communication,
- Collaborated with hardware engineers to ensure compatibility of embedded systems and smooth system integration.

Technologies: Python, CAN, LIN, Ethernet, Jira.

03.2022 – 06.2022

Company name: **Concise Software**

Job position: **Frontend Developer**

Tasks:

- Conducted code reviews and implemented performance optimizations in JavaScript, HTML, and CSS, enhancing application maintainability and user experience,
- Collaborated with designers to implement UI/UX improvements, ensuring intuitive and user-friendly interfaces,
- Participated in Agile Scrum ceremonies, working closely with developers and testers to deliver high-quality solutions on time.

Technologies: JavaScript, HTML, CSS, Git.

08.2021 – 03.2022

Company name: **Concise Software**

Job position: **Software Tester**

Tasks:

- Tested web and mobile applications, performing UI, UX, and API validation using Postman,
- Executed functional and performance tests to guarantee stability and usability across platforms,
- Documented defects in Jira and collaborated with developers to resolve issues efficiently.

Technologies: Postman, Jira, Git.

01.2021 – 07.2021

Company name: **IT-Solve**

Job position: **Software Tester**

Tasks:

- Conducted manual testing of mobile and web applications, ensuring compliance with business requirements,
- Performed optimization and performance testing for MongoDB-based web applications,
- Validated hardware integrations on client-specific devices, documenting issues and improvements.

Technologies: MongoDB, Jira, Git.

08.2019 – 12.2020

Company name: **ZF Automotive Systems Poland Sp. z o.o.**

Job position: **Software Qualification Test Technician**

Tasks:

- Developed and executed automated test cases in Python for radar-based automotive systems,
- Managed API testing scripts in C#, ensuring correct integration with communication software,
- Performed smoke, black-box, and white-box tests for embedded systems to validate functionality under varied conditions,
- Conducted Ethernet communication tests between automotive components, ensuring reliable system interactions.

Technologies: Python, C#, Ethernet, Jira.

I consent to the processing of my personal data contained in the documents I have provided by B2B.net S.A. for purposes related to my participation in the current recruitment process.

I also acknowledge and declare that I have understood that the controller of my personal data collected based on this consent is B2B.net S.A. with its registered office in Warsaw, Al. Jerozolimskie 180, 02-486 Warsaw. The data will be processed in accordance with the provisions of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (hereinafter referred to as the GDPR). I have provided my data voluntarily, and I have the right to withdraw my consent to data processing at any time by sending a request to: rekrutacja@b2bnetwork.pl. Providing the data is necessary to achieve the aforementioned purpose, therefore, requesting their deletion constitutes my resignation from further participation in the recruitment process. I also have the right to access and correct my data at any time. I am also aware that the recipients of my personal data may only be entities authorized by law, as well as those authorized under agreements concluded by B2B.net S.A., in particular with clients.
