

Alena Sobolevskaya – QA Engineer

Belarus, Minsk

Contacts

Alena2287@gmail.com, +375295608300

Objective

I am ISTQB certified QA Engineer. My projects – web, desktop and mobile applications in different domains: Augmented Reality, Healthcare, Education, Dating, Entertainment. I worked as single QA and in a QA team including dedicated ones. I have investigated and tried different software test activities: exploratory and scripted manual testing, test design, performance testing, test automation (on junior level), user support.

I am interested in learning Test automation.

Summary

I have the following skills:

- WEB applications testing (Pixel Perfect approach)
- iOS, Android application testing
- Desktop applications for Windows, Mac OS, Linux
- Test planning and reporting
- Test design (check-lists, test cases, wiki, mind maps)
- Performance testing using Jmeter (Load, Stress, Scalability, Recovery testing)
- Compatibility testing
- Using tools (XCode, Adb, Charles, Browserstack, Katalon Studio, Asana, Trello, Jira)

Work Experience

CodersClan

December 2019 –

Mobile and web apps QA. Remote work.

Pixel perfect testing, Compatibility and Cross-Platform testing of Marketing web-sites

Using: Figma, Photoshop, Zeplin, Adobe XD, PerfectPixel, WhatFont

Timvero

25.03.2019 - 30.12.2019

Mobile and web apps quality assurance. Business Analyst activities, communication to customers.

Sam Solutions

01.02.2017 – 01.03.2019

Web and mobile apps testing.

Tools: Jira, Asana, Trello, Katalon Studio.

Testing of small and large web and mobile projects with teams from 3 to 25 people. Test strategy implementation.

Domains: sport, entertainment, e-commerce.

I also conducted performance testing of a server on Amazon, horizontal auto-scaling testing, re-testing the system after server architecture updates.

- Performance test plan, reports
- Load and stress testing
- Scalability testing
- Test process improvement

Banuba

01.03.2016– 13.02.2017

Mobile application testing, Android platform.

I also provided Performance testing of the platform to make sure it is ready to world-wide success. I monitored server work under big load, reported mistakes and worked on their fixes with server team.

Paralect

09.02.2014 – 01.03.2016

Projects

GoLance

URL: <https://golance.com/>

Web-application for online job search. I worked as single QA and conducted the full cycle of testing for application from scratch: new functionality testing, UI, Usability, Cross-browser testing, basic performance testing,

Work in Kanban development methodology with on site and dedicated team members.

Education

Belarusian State University – Institute of Journalism

Journalist of printed media — 2004-2009

ISTQB® Certified Tester, Foundation Level

May, 2014

Other skills

- Frameworks – Scrum, Kanban
- English – Advanced
- Basic knowledge of HTML, CSS, JavaScript.
