Project Manager for Tech Refresh Shared Mainframe

As Project Manager for Tech Refresh Shared Mainframe I am responsible for the overall coordination and control of all efforts relating to in-scope projects, from initialization through to closure to ensure project success. The main tasks include but are not limited to:

- Collaborating with various project teams and stakeholders to define transformation / refresh projects.
- Developing and executing project plans
- Coordinating tasks among cross-functional groups
- Working with stakeholders to align on objectives, deliverables and plan actions
- Supporting with E2E Capex Ordering process for new Hardware & Software
- Holding and running meetings / calls to drive progress / discuss status
- Preparing presentations with status of ongoing projects
- Continued service improvement by proposing process changes to current procedures.

Advisory PMO for BENELUX & PMO Lead position

Supporting multiple shared accounts in which I would work directly with the Program Leads to ensure that the defined project management standards are met to achieve project success. Daily tasks include monitoring and updating financial reports and KPIs of sizeable projects. Tracking deadlines, deliverables, resources, and performance throughout the project life cycle. Holding owners accountable for their commitments, supporting and following up with them to ensure completion of defined tasks. Planning and facilitating weekly interlocks with Program leads and PMs.

Project QA & Communication Manager position

Acquired an excellent set of inter-disciplinary skills related to project quality and communication cadence. Ensuring all process deliverables such as Change Management, Availability Management, Knowledge Management etc. are of a high quality using several methodologies like TEMPO & WWPPM. Proactively contributing to process and system enhancements, especially in support of developing service documents and all quality issues. Creating awareness regarding Service Quality Indicators (SQIs) and providing training accordingly.

Dutch Helpdesk Agent– GDF Delivery Analyst position

Handle technical queries and problem calls from end users and other IT teams - facilitating the correct and timely handling of these contacts. Implementing GDF methodologies, creating reports based on process behavior and creating RCAs on exceptions and investigating continual improvement / client value creating opportunities.

Lead Desk Focal - Coca Cola Service Desk position

Representing the SD during Operational and Senior Management meetings to ensure understanding of specific requirements of services and projects that impact on service delivery. Work as first point of contact between technical teams and SD to resolve all incidents within agreed SLA / SLO. Assistant trainer, compiling work instructions (training manuals) and updating knowledge database. Monitoring of work load and allocating tasks for optimal daily operation.
