Profile

Hi!

I'm experienced Front End Web Developer with a demonstrated history of successful projects. I'm graduated with engineer's degree focused in Computer Programming from Belarusian State University of Informatics and Radioelectronics.

Personal skills:

- Responsibility - I like to make things done in time. So when I start to work on something, I will do my best to ensure that I will do my part of a work in time.
- Technological competence - I'm always learning new technologies and new things that can help me to do my job even better and more effective.
- Team player - I'm always opened to help and learn from other members of my team. If somebody from my team will ask for my help I will always help them. Also I have an experience of working with completely different personal types of professionals successfully.
- Problem solver - One of my biggest passions is to solve problems. Whether it's to extend something existing or design something completely new from scratch - I will search for the best approach and will apply only the best solutions.
- Attention to detail - small details are making up a complete picture. That's why I'm striving for excellence and consistency across any type of application I'm developing.
- Initiative - If there is something to improve in the existing project or development cycle, I will discuss it with my colleagues and will do my part to make things better.
- Awareness - I'm always aware of quality of my code and always striving to write even better code. I'm not afraid to admit my mistakes and to learn from them.

Skilled in:

- JS
 - Building projects from scratch, with scalable and modular architecture
 - Using newest standards (including ES6 and newer, native browsers APIs, and more)
 - Have experience in legacy code update (bug fixing, implementing new features, code refactoring)
- HTML
 - Writing semantic and modern HTML with special tags for elements
 - Using best practices on HTML documents
 - Experienced in writing a semantic HTML for a people with a visual disabilities
- CSS:
 - Using CSS pre-processors and post-processors
 - Developing responsive web-design
 - Media queries and more
