WORK EXPERIENCE

Makeitright

04/2020 — present

Software tester

Executing test cases, reporting and managing bugs, retesting, regression testing, cooperation with developers, UX, other QAs

MicroStrategy

02/2019 — 03/2020

Software tester

Member of a scrum team (consisting of 4 developers and 1 QA) creating a React plug-in for Jupyter Notebook and RStudio which allows data transfer between them and

MicroStrategy.

Main responsibilities:

- execution of tests on many levels (Functional, Negative, E2E, System, Integration, Internationalization, and Regression)
- development of E2E automated tests using Python and Selenium Webdriver
- detection and tracking of software defects and inconsistencies using Rally agile software
- creation of testing documentation in English including QA feature designs, test plans and test cases
- preparation and conduction of knowledge sharing sessions on best testing practices
- collaboration with other teams located in Poland, USA and China
- conduction of an analysis of users stories for complete feature validity

Hycom

07/2018 — 02/2019

Software tester

Project for telco company (Polkomtel), one of the biggest project in Eastern Europe. Our team was responsible for delivering one of the biggest part of the project - SAP Hybris. It was quite challenging project due to a big number of micro-services delivered by several external companies. Fast and clear communication was very important. Our development team had around 30 developers and 5 QAs. Main responsibilities:

- integration tests and deep analysis of logs in case of issues
- regression tests
- issues reporting and retests
- issues managing (Jira, HP ALM)
- close cooperation with internal and external teams
- executing test cases (HP ALM)
- providing and keeping up documentation

Circle K via b2b.net

03/2017 — 06/2018

Software tester

Outsourcing project for Circle K company. Our product was Circle K Extra Club - loyalty program web app for Circle K customers. Responsibilities:

- SAT test cases preparing and executing
- UI and compatibility tests
- regression tests and retests
- assisting in preparing and executing UAT test cases
- cooperating with developers and business units
- detecting and reporting issues

Testronic

01/2016 — 07/2016

Video games tester

Testing various video games projects, mostly on XBOX ONE, PS4 and PC.

- executing test cases
- retests
- regression tests
- exploratory tests
