PROFESSIONAL EXPERIENCE

02.2025 – Currently

Company name: **Freelance IT Consultancy – Various clients (Emagine, PWC, etc.)**

Job position: **QA Engineer/ Test Lead/ QA and Test Manager**

Tasks:

- Defined and executed end-to-end test strategies across multiple industries (finance, AdTech, gaming, e-commerce).
- Led SIT, UAT, and E2E testing programs, ensuring full alignment with business objectives.
- Designed and implemented automation frameworks using Selenium, Robot Framework, and Postman.
- Managed test governance and quality reporting for large-scale enterprise systems (e.g., Salesforce at Criteo).

- Drove QA process optimization and introduced risk-based, KPI-driven quality practices.
- Provided QA leadership and stakeholder coordination across distributed Agile teams.

Technologies: OS: Android, iOS, OSX, Windows, Linux (Ubuntu; Mint); SDLC: Jira, TFS; Testing support tools: Zephyr, X-Ray, Selenium (IDE; WebDriver), Protractor, Browserstack; Programming and DB: JavaScript, TypeScript, Python, C#, Java, Kotlin, Cucumber, SQL, MongoDB; Other Tools: Postman, Newman, Jmeter, Jenkins, Travis CI, Bamboo; Testing approaches: Manual, Automated, Regression, End to End, Destructive, Exploratory, Compliance, Accessibility, Non-functional, API, Integration, Unit, Contract (Microservices), Security, Performance.

02.2024 – 04.2025

Company name: **Undisclosed (Gambling)**

Job position: **Head of QA**

Tasks:

- Led a QA team of five specialists in a fast-paced, compliance-driven gambling environment.
- Managed end-to-end QA processes, focusing on API, regression, and compliance testing.
- Delivered proofs of concept for automated UI (mobile) and API testing using Postman and Newman.
- Improved internal workflows and communication between QA, development, and customer support teams.
- Designed a strategic PoC for gaming solutions tailored to the Persian Gulf region, ensuring regulatory compliance.

Technologies: OS: Android, iOS, OSX, Windows; SDLC: Jira; Testing support tools: Zephyr, Selenium (IDE; WebDriver), Nightwatch.js, Xcode; Programming and DB: Python, JavaScript, BDD, MongoDB; Other Tools: Postman, Newman, JMeter, OpenAI, GitHub Copilot, Kafka, DataDog; Testing approaches: Manual, Automated (PoC), Regression, End to End, Destructive, Exploratory, Compliance, Accessibility, Non-functional, API, Integration.

08.2023 – 03.2024Company name: **COTO**Job position: **Head of QA**Tasks:

- Expanded and led the QA team from 3 to 5 professionals, strengthening automation and performance expertise.
- Developed and executed a comprehensive QA and test automation strategy across API, web, and mobile platforms.
- Implemented automated testing using Python, Robot Framework, Appium, and Pcloudy.
- Introduced performance testing practices with JMeter to enhance system reliability.
- Contributed to AI testing, validating model inputs and outputs for accuracy and consistency.

Technologies: Android, iOS, OSX, Windows; SDLC: Jira; Testing support tools: Zephyr, Selenium (IDE; WebDriver), Robot Framework, Cucumber, Appium, Pcloudy; Programming and DB: Python, JavaScript, BDD, MongoDB; Other Tools: Postman, Newman, Jmeter, OpenAI, Github Copilot, Kafka, DataDog; Testing approaches: Manual, Automated, Regression, End to End, Destructive, Exploratory, Compliance, Accessibility, Non-functional, API, Integration, Unit, Contract (Microservices).

08.2022– 02.2024Company name: **DanAds**Job position: **Head of QA**Tasks:

- Led a major QA department transformation, optimizing team size from 40 to 15 for greater efficiency.
- Managed budgeting, staffing, and internalization of QA processes previously handled by an external vendor.
- Built and led a dedicated test automation team focused on scalable frameworks and continuous improvement.

- Designed and implemented a custom automation strategy aligned with business goals and product priorities.
- Oversaw QA operations and governance, ensuring quality standards and cross-team alignment.
- Drove process optimization and efficiency, resulting in faster delivery and higher product quality. Combined technical innovation and leadership to strengthen product quality and process efficiency.

Technologies: OS: OSX, Windows; SDLC: Jira; Testing support tools: Selenium (IDE; WebDriver), Nightwatch.js, Browserstack; Programming and DB: JavaScript, SQL, MongoDB; Other Tools: Postman, Newman, Jmeter, OpenAI/ChatGPT, Github Copilot, Jenkins; Testing approaches: Manual, Automated, Regression, End to End, Destructive, Exploratory, Accessibility, Non-functional, API, Contract (Microservices).

02.2022 – 09.2022

Company name: **Ministry of Finance**

Job position: **Test Manager**

Tasks:

- Managed QA processes and team activities within a large-scale public sector project.
- Focused on performance testing and process optimization to ensure system reliability.
- Applied Agile methodologies to improve collaboration and delivery efficiency.
- Supported the Project Management unit by implementing structured QA practices and reporting.
- Ensured high-quality outcomes through strategic planning and test execution oversight.

Technologies: OS: OSX, Windows; SDLC: Azure DevOps; Testing support tools: Selenium (IDE; WebDriver), Pytho; Programming and DB: JavaScript, SQL, MongoDB; Other Tools: Postman, Newman, Jmeter; Testing approaches: Manual, Automated, Regression, End to End, Destructive, Exploratory, Compliance, Accessibility, Non-functional, API, Integration, Unit, Contract (Microservices).

08.2019 – 02.2022

Company name: **Roche**

Job position: **Test Automation Engineer/QA Team Leader/Scrum Master**

Tasks:

- Led a QA team of five engineers, overseeing test automation and delivery quality.
- Designed and maintained automated testing frameworks to support continuous integration.
- Facilitated Scrum ceremonies and promoted Agile best practices within the team
- Ensured high-quality software delivery through efficient testing and collaboration.
- Drove a culture of continuous improvement focused on productivity and technical excellence.

Technologies: OS: OSX, Windows; SDLC: Jira; Testing support tools: Selenium (IDE; WebDriver), Nightwatch.js, Browserstack; Programming and DB: JavaScript, SQL, MongoDB; Other Tools: Postman, Newman, Jmeter, OpenAI/ChatGPT, Github Copilot; Testing approaches: Manual, Automated, Regression, End to End, Destructive, Exploratory, Non-functional, API, Integration.
