

Test Automation Engineer – Dawid Musiał

WHY DAWID

- Dawid has over 7 years of QA experience, including hands-on work with Python, Robot Framework, and Selenium.
- Holds ISTQB Foundation and Advanced Level certificates, Dawid demonstrates strong theoretical knowledge and best-practice application in test design, execution, and process improvement.
- Brings practical knowledge of Docker, SQL, Jenkins, API, and Jira.
- Worked for years in Scrum teams, collaborating closely with developers and analysts, refining requirements, supporting UAT, and proactively improving test processes.

EDUCATION

Dates	Education (names of university/ degree)
2024 – currently	Warsaw University of Technology Computer Science

SKILLS

- **Test automation:** Python, Robot Framework, Selenium, Java, TestNG,
- **Manual testing:** functional, regression, integration, exploratory,
- **CI/CD:** Jenkins, Docker,
- **Test management:** JIRA, Zephyr, Confluence,
- **API testing:** Postman, REST, SOAP, JSON,
- **Databases:** SQL,
- **Tools:** Wireshark,
- **Methodologies:** Agile, Scrum, Waterfall.

CERTIFICATES AND TRAININGS

- ISTQB Advanced Level
- ISTQB Foundation Level

LANGUAGES

- English – B2

PROFESSIONAL EXPERIENCE

05.2017 – currently

Company name: **Pentacomp**

Job position: **QA Automation Engineer**

Tasks:

- Designing, developing, and maintaining automated test suites for web and mobile applications using Robot Framework with SeleniumLibrary, extended by custom Python keywords and libraries,
- Automating REST and SOAP service tests in Robot Framework and Postman,
- Supporting manual and exploration testing for new features and mobile scenarios,
- Preparing and managing test data, verifying data consistency via SQL queries, and performing integration checks across UI and API,
- Ensuring test execution within Jenkins pipelines, including parametrized runs, archiving Robot Framework reports, Dockerized test environments, and integration with JIRA/Zephyr for test case traceability,
- Troubleshooting application and environment issues using Wireshark, Selenium logs, and API monitoring,
- Close collaboration with developers and analysts in Agile ceremonies to refine requirements and acceptance criteria,
- Preparing and maintaining documentation, including test plans, regression checklists, and user guides,
- Delivering user training sessions and supporting UAT with test scenarios and structured feedback,

- Introducing improvements in test automation coverage and structure, including refactoring of existing suites and optimization of execution time.

Technologies: Python, Robot Framework, Java, Selenium, SQL, Jenkins, Wireshark, JIRA, Zephyr, Postman, Docker, REST, SOAP.

I consent to the processing of my personal data contained in the documents I have provided by B2B.net S.A. for purposes related to my participation in the current recruitment process.

I also acknowledge and declare that I have understood that the controller of my personal data collected based on this consent is B2B.net S.A. with its registered office in Warsaw, Al. Jerozolimskie 180, 02-486 Warsaw. The data will be processed in accordance with the provisions of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (hereinafter referred to as the GDPR). I have provided my data voluntarily, and I have the right to withdraw my consent to data processing at any time by sending a request to: rekrutacja@b2bnetwork.pl. Providing the data is necessary to achieve the aforementioned purpose, therefore, requesting their deletion constitutes my resignation from further participation in the recruitment process. I also have the right to access and correct my data at any time. I am also aware that the recipients of my personal data may only be entities authorized by law, as well as those authorized under agreements concluded by B2B.net S.A., in particular with clients.
