

Denis Zaitsev | IT Sales/ Project manager/ Software Developer

/ Summary /

Experienced IT project manager focused on global sales with advanced technical background in A/V and digital broadcast. Junior-level frontend/backend software developer (PHP, JavaScript, AJAX, jQuery, MySQL, HTML5/CSS3). English fluent speaker, proficient in CRM, SRM, ERP, Office tools, team frameworks (Jira, GitHub, Wrike) and project management methodologies (Agile, Scrum).

/ Education /

College of Telecommunication | 2010

CCNA, computer networks associate

NIKFI | 2014

Video & Audio processing and transmission expert

/ Work experience /

12 years in IT, focused on enterprise IT solutions and services sales dedicated to TV broadcast and digital video content distribution in maritime, global OTT, residential and hospitality projects.

IT Technician & Sales	BV	2009 – 2014
Sales Director	NetUP	2015 - 2016
PM/Software Developer	ARKCOM	2016 - now

With extensive background in IT and sales I see myself as a Software Developer or Project Manager in IT company. My work experience includes lots of communication to overseas english speaking customers, mostly to IT managers, CEOs, CTOs and similar decision makers.

Specifics of my work as a PM require that I'm proficient in software development methods. Over the time I upgraded my development skills up to the extent where I'm able to maintain server and client web applications as engineer or even develop web applications as a full-stack web developer on my own.

/ Example projects /

Thomson Reuters | **Global real-time video monitoring** | mass media | **UK**

Problem: Needed to monitor ISDB-T channels in real-time across three distant offices.

Environment: Dedicated world area network where market data and news information is circulating between offices.

Solution: turnkey platform capable of receiving ISDB-T signal in Brazil and sending it as HLS IP streams to offices in London, New York and Washington, D.C. via private WAN/CDN.

Credit Europe Bank | **Fintech data storage** | financial | **Netherlands**

Problem: customer data storage system needed an upgrade.

Environment: bank's own data center with current storage in service, no downtimes acceptable during migration.

Solution: HP 3PAR disk arrays with fail-safe dual controllers were deployed parallel working with existing storage. Data migration was done without downtime.

TVC | **Fail-safe data center power supply** | mass media | **Russia**

Problem: inefficient control of media processing and broadcast equipment power supply.

Environment: TV studio own data center with dual power line inlet, diesel generator and UPS array.

Solution: remotely controlled rack smart ATS capable of transferring power from primary to backup source in less than 14ms.

Wartsila | **Maritime entertainment system** | equipment installer | **Netherlands**

Problem: Reliable TV entertainment of maritime crews working away from shore.

Environment: Autonomous network installed on maritime vessels requiring IPTV entertainment system to maintain extended uptime.

Solution: Maritime-class self-adjusting VSAT dish supplying signal to IPTV server connected to on-board LAN distributing streams to TV sets across the ship.

Free | **Video broadcast platform design** | service provider | **France**

Problem: needed a dense IPTV head-end capable of receiving almost 300 TV channels from satellite.

Environment: colocation data center with an array of satellite dishes.

Solution: Custom servers with DVB receiving cards connected to array of satellite dishes.

/ Key skills & knowledge /

Software development | Project management | Sales | CRM/SRM | Team management

My main specializations are project management and sales of hardware/software and networking services for A/V and digital broadcast projects. My additional skills are business accounting, product ownership, market research, financial reporting and forecast, software development.

I possess moderate skills in engineering (computer networking, media broadcast, desktop, server and mobile platforms, server administration, software development). These additional skills help me to negotiate sales of sophisticated IT solutions or perform project management tasks during deployment or after-sale support.

/ Tools I use /

Jira, Confluence, Wrike, Notion, SugarCRM, SuiteCRM, Pipedrive, Trac, Bitrix, 1C, Hubspot, GitHub, ActiveCampaign

/ Programming skills /

HTML 5, CSS 3, JS, IPv4, IPv6, MySQL, PHP, NGINX, Apache, Linux, Xcode

/ Additional courses /

IBM Top Gun | System-X sales

Hitachi Tech Academy | Enterprise data storage design

VMware | ESXi technical pre-sale

/ Personal profile /

I'm passionate about different cultures around the world and this passion helps me to eliminate cross-culture and language barriers when communicating to customers.

I enjoy sports, traveling and newest tech. Non-smoker, neutral on drinking.

32 y.o., Belarus citizen, currently living in Slovenia.

Car driving license, work permit for Slovenia. I'm willing to work remotely or relocate if necessary. All work permits and visas can be obtained upon request.
